# Invisifold Sliding Window And Door

THE NEXT GENERATION IN  
SLIDING TECHNOLOGY

---

**TRANSFORM YOUR HOME**

---

# Invisifold Window

Invisifold Sliding Windows can transform your Conservatory, Orangery or House and give you the Mediterranean feel at an affordable price.

Vent your Sliding Window to create an airy feel or fully open to create that Mediterranean look.

# Invisifold Door

## Invisifold Sliding Doors

The next generation in sliding door technology, no visible hardware other than the door handle, no rollers, or bogie wheels and maintenance free.

Manufactured from standard UPVC profiles with no manipulation of cutting sizes

# Invisifold Orangery

Create a contemporary look and transform your Orangery, Conservatory or extension into a inside outside living area.

# Invisifold Conservatory Design

The Conservatory design allows you to design a sliding window with traditional Fanlights but also have the option to slide and fold the bottom section. This design can sit on a dwarf wall or could be full height.

# Invisifold Fully Concealed Hardware

With fully concealed hardware the system leaves you with clean lines, so does not compromise your UPVC system.

# Invisifold Indicative Security Test

The system has passed an indicative security test with BM Trada and will be put through a Pas24 Test mid February.

We have already achieved an A4 weather test result which is more than adequate for the British market.
